Art Unit: 1625

DETAILED ACTION

Claims pending 1-8, 10, 12-14.

Claims 12-14 have been withdrawn.

Applicants had elected group I of the restriction.

Group I was drawn to compounds wherein R3 and R31 do not form a ring and also R7 was limited to the group as given in claim 6.

Applicants have not amended the claim to the scope of the elected group.

The rejection of the claims 1-8 and 10 under provisional ODP over application 10/589,082, still stands as the claims are still not in a condition for allowance.

The rejection of the claims under 35 USC 112 first para has been withdrawn with respect to the solvates, hydrates and also for the definition of R1 and R2 as applicants have amended the claims.

New rejection:-

Claim Rejections - 35 USC § 103

The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

Claim 1-8, 10, are rejected under 35 U.S.C. 103(a) as being obvious over (provided in the 1449) WO 97/28131, WO 99/051113, WO 2004/018465. WO 0205616, US 7329676.

The applied reference has a common inventors with the instant application. Based upon the earlier effective U.S. filing date of the reference, it constitutes prior art only under 35 U.S.C. 102(e). This rejection under 35 U.S.C. 103(a) might be overcome by: (1) a showing under 37 CFR 1.132 that any invention disclosed but not claimed in the reference was derived from the inventor of this application and is thus not an invention “by another”; (2) a showing of a date of invention for the claimed subject matter of the application which corresponds to subject matter disclosed but not claimed in the reference, prior to the effective U.S. filing date of the reference under 37 CFR 1.131; or (3) an oath or declaration under 37 CFR 1.130 stating that the application and reference are currently owned by the same party and that the inventor named in the application is the prior inventor under 35 U.S.C. 104, together with a terminal disclaimer in accordance with 37 CFR 1.321(c). This rejection might also be overcome by showing that the reference is disqualified under 35 U.S.C. 103(c) as prior art in a rejection under 35 U.S.C. 103(a). See MPEP § 706.02(l)(1) and § 706.02(l)(2).

Scope & Content of Prior Art MPEP 2141.01

All the above reference disclose a similar core. Some are phenylbenzonaphthyridine or phenylanthridines. They al have the same use. having PDE activity.

Difference between Prior Art and the claims MPEP 2141.02

None of the compounds with phenanthridine core, have the guanidine R7 group .

However similar compounds with naphthiridine core with the same activity do have the guanidine core.

Prima Facie Obviousness , Rational and Motivation MPEP 2142-2413

With the various references showing the same core and differing only in the R7 substituent, keep the same activity. Even when the core is a naphthyridine the activity remains the same . Thus from the teaching of the WO 2004/018465 and its R5 corresponding to the R7 of the instant application., one of skill in the art would have been motivated to modify the compounds of WO 97/28131, WO 99/051113, and WO 0205616, US 7329676. to obtain the compounds of the invention. KSR v Teleflex. 2007.

Double Patenting

The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the “right to exclude” granted by a patent and to prevent possible harassment by multiple assignees. A nonstatutory obviousness-type double patenting rejection is appropriate where the conflicting claims are not identical, but at least one examined application claim is not patentably distinct from the reference claim(s) because the examined application claim is either anticipated by, or would have been obvious over, the reference claim(s). See, e.g., *In re Berg*, 140 F.3d 1428, 46 USPQ2d 1226 (Fed. Cir. 1998); *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) or 1.321(d) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent either is shown to be commonly owned with this application, or claims an invention made as a result of activities undertaken within the scope of a joint research agreement.

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

Claims 1-8, and 10 are rejected on the ground of nonstatutory obviousness-type double patenting as being unpatentable over claims 1-13 of U.S. Patent No. US 7329676. in view of WO 97/28131, WO 99/051113, WO 2004/018465, WO 0205616.

See rejection above.

Conclusion

Claims 1-8 and 10 stand rejected.

Claims 12-14 are withdrawn.
